User story 001:

Title: Start a run	Priority: High	Estimate: 1 day
User Story: As a player I want to start a new run In order to begin a fresh gameplay session with reset/new progress		
Acceptance Criteria: ● The player can start a new run from the main menu. ● All stats and progress are reset. ● The new run is initialized correctly. ● The map and cards are generated again.		

User story 002:

Title: Explore Rooms	Priority: High	Estimate: 3 days
User Story: As a player I want to explore new and different rooms In order to discover new cards and have a different experience every run		
Acceptance Criteria: ● The player can move between rooms. ● Each room has hidden cards. ● Cards can be collected once per room. ● Rooms can be revisited but have no additional rewards.		

User story 003:

Title: Interior Map Generation	Priority: High	Estimate: 3 days
User Story: As a game designer I want the interior rooms to be generated randomly In order to make every run feel different, unpredictable and unique		
Acceptance Criteria: ● 3 rooms are generated in addition to the main entrance of the house. ● The position of the rooms vary every run. ● Some rooms are connected. ● One of the rooms is randomly assigned as the boss room. ● Random and hidden cards are in each room.		

User story 004:

Title: Exterior Map Exploration	Priority: Medium	Estimate: 1 day
User Story: As a game designer I want the exterior area remains fixed between every run In order to give the players a familiar starting area		
Acceptance Criteria: ● The exterior layout is identical every run. ● Cards can still be found there. ● Cards are hidden randomly around the exterior layout.		

User story 005:

Title: Card Collection Storage	Priority: High	Estimate: 1-2 days
User Story: As a developer I want want collected cards to be stored per run In order to use the correct deck during combat		
Acceptance Criteria: ● Cards are added to the player's current deck. ● Cards can appear multiple times. ● Cards are randomly selected every combat. ● Cards are stored as the player finds them around the map.		

User story 006:

Title: Entering a Combat	Priority: High	Estimate: 1-2 days
User Story: As a developer I want combat to start when the player gets closer to the boss In order to trigger the combat automatically		
Acceptance Criteria: ● Combat begins immediately upon getting close to the boss. ● Player and enemy are initialized for battle. ● The player’s deck is randomly selected from the player’s stored cards.		

User story 007:

Title: Turn-based Combat	Priority: Medium	Estimate: 2-3 days
User Story: As a game designer I want to alternate between player and enemy turns In order to create strategic pacing		
Acceptance Criteria: ● Player acts first. ● Enemy acts second. ● Turns alternate correctly. ● Turns can be affected by cards.		

User story 008:

Title: Random Hand Draw	Priority: High	Estimate: 2 days
User Story: As a player I want to receive a random set of cards each combat In order to adapt my strategy dynamically		
Acceptance Criteria: ● A new hand is generated every run. ● Cards are selected from the player's current card collection. ● Cards can duplicate in a hand. ● After using one card a new one is selected randomly to take its place in the hand.		

User story 009:

Title: Energy System	Priority: High	Estimate: 2-3 days
User Story: As a game designer I want cards to consume energy when used In order to limit how many actions the player can take during combat and strategies the use of resources		
Acceptance Criteria: ● Each card has a fixed energy cost. ● The player starts with 100 energy points every combat. ● Energy points cannot exceed 150. ● Cards cannot be used without enough energy. ● Wildcards can be used to trade life for energy during combat.		

User story 010:

Title: Wildcard Mechanic	Priority: Medium	Estimate: 1-2 days
User Story: As a game designer I want a card that trades health for energy In order to introduce risk based decision every combat		
Acceptance Criteria: ● Using this type of card reduces the player's health points. ● The player recovers energy points. ● The effect is applied immediately. ● CAn only be used once per combat. ● The player can only have one wildcard per run.		

User story 011:

Title: Stats Tracking	Priority: High	Estimate: 2 days
User Story: As a data analyst I want the game to track the player's performance every run In order to evaluate the gameplay results		
Acceptance Criteria: ● The time duration of every run is recorded. ● Cards collected are recorded. ● Damage dealt and received is recorded. ● Health recovered is recorded.		

User story 012:

Title: End Run Summary	Priority: Medium	Estimate: 1 day
User Story: As a player I want to see the summary at the end of a run In order to understand my performance		
Acceptance Criteria: ● A summary screen is shown after the run ends by either defeating the boss or dying. ● All stats are displayed clearly.		

User story 013:

Title: Player's Death	Priority: Medium	Estimate: 1-2 days
User Story: As a developer I want the game's run to end when the player is defeated by reaching 0 health during combat In order to maintain valid gameplay states		
Acceptance Criteria: ● The run ends immediately when the health points of the player reaches 0. ● The player cannot continue the run. ● All the player's progress is lost and reset for another run.		

User story 014:

Title: Enemy Attacks	Priority: High	Estimate: 1 day
User Story: As a developer I want the enemy to execute an attack during its turn In order to correctly apply damage and flow during combat		
Acceptance Criteria: ● The enemy only attacks during its designated turn. ● The attacks reduce the player's health points based on predefined damage values. ● The attack is skipped if the enemy is affected by a control effect. ● If the player has an active evasion effect, the attack has no damage. ● The system updates the player's health points after the attack. ● The turn switches back to the player after the enemy's action.		

User story 015:

Title: Enemy Difficulty Balance	Priority: High	Estimate: 2-3 days
User Story: As a data analyst I want to track the outcomes of the player encounter with the enemy In order to evaluate whether the difficulty scaling is balanced		
Acceptance Criteria: ● Record whether each encounter ends in victory or defeat. ● The system tracks how many attempts are needed to defeat the boos. ● Record the player's remaining health after each combat. ● Comparison between different runs.		

User story 016:

Title: Combat UI Feedback	Priority: High	Estimate: 1 day
User Story: As a UI designer I want the combat interface to clearly display the player and enemy status In order to help the player to make informed decisions		
Acceptance Criteria: ● Player health is always visible. ● Enemy health is always visible. ● Player energy is clearly displayed. ● The current hand of cards is visible and readable. ● The energy cost of every card is displayed.		

User story 017:

Title: Card Pickup Visual Feedback	Priority: Medium	Estimate: 1 day
User Story: As a UI designer I want the process of acquiring cards to have a clear visual and interactive feedback In order to make the action of finding a card more rewarding and simple to understand		
Acceptance Criteria: ● Each acquired card shows its name, type and effect in a readable format. ● After collection, the UI updates to reflect the new cards of the collection. ● A confirmation indicates the card was added to the player's collection.		

User story 018:

Title: Immersive Art Style	Priority: Medium	Estimate: 2 days
User Story: As a player I want the game to have a consistent and attractive art style In order to feel immersed and connected to the character and the environment		
Acceptance Criteria: ● Cards have a clear visual based on their type. ● Sound effects match the tone of the game. ● The color palette is consistent, attractive and non distracting. ● The character's design is consistent across gameplay elements. ● The exterior and interior environments follow a visual theme.		

User story 019:

Title: Combat Balance	Priority: High	Estimate: 2-3 days
User Story: As a game designer I want the cards and energy costs to be balanced In order to ensure fair and strategic gameplay		
Acceptance Criteria: ● Stronger cards consume more energy than weaker ones. ● Low cost cards provide weaker or smaller effects. ● The player cannot win consistently by using only one type of card. ● The energy system enforces decision making. ● All card types have a meaningful use.		

User story 020:

Title: Sound Effects for Actions	Priority: Medium	Estimate: 1 day
User Story: As a sound designer I want key gameplay actions to have a unique and distinct sound effect In order to ensure player feedback and immersion to the game		
Acceptance Criteria: ● Playing and using a card triggers a unique sound effect. ● Collecting a card plays a rewarding sound. ● Enemy attacks have a unique audio. ● Different card types have a slightly different sound effect. ● Sounds are not overwhelming.		

User story 21:

Title: Attack Cards	Priority: High	Estimate: 1 day
User Story: As a game designer I want attack cards to deal varying amounts of damage based on their energy costs In order to provide meaningful offensive choices during combat		
Acceptance Criteria: ● Attack cards deal damage within defined numerical ranges. ● Players must choose between multiple attack options rather than relying on one. ● The energy costs vary depending on the amount of damage the card can deal to the enemy.		

User story 22:

Title: Defensive Cards	Priority: High	Estimate: 1 day
User Story: As a game designer I want defensive cards to provide and offer healing and protection options In order to allow players to survive longer during combat and recover from damage		
Acceptance Criteria: ● Some cards restore player health points. ● Some cards prevent or avoid incoming damage from enemy attacks. ● Healing values are balanced against enemy damage output. ● Players must decide when to heal versus when to attack.		

User story 23:

Title: Control Cards	Priority: Medium	Estimate: 1-2 days
User Story: As a game designer I want control cards to influence the enemy behavior In order to add strategic depth and turn management		
Acceptance Criteria: ● Control cards can skip enemy turns. ● Different cards apply different control levels (1 turn or 2 turns). ● Control effects are temporary and defined. ● Control cards have higher energy costs than other cards. ● Players must decide when it is worth delaying the enemy attacks instead of doing other actions.		

User story 24:

Title: Card Description Clarity	Priority: Medium	Estimate: 1 day
User Story: As a UI designer I want card descriptions to be clear and easy to read for the players In order to help players understand their effects quickly		
Acceptance Criteria: ● Text is easy to read and short. ● Important effects or values highlighted. ● Card type is clearly indicated.		

User story 25:

Title: Player Movement Feedback	Priority: Medium	Estimate: 1 day
User Story: As a player I want visual feedback when moving between rooms In order to understand my current position and where to go		
Acceptance Criteria: ● Movement is animated or indicated. ● Location is always visible. ● The movement of the character is consistent with the controls.		

User story 26:

Title: Combat Result Feedback	Priority: Medium	Estimate: 1-2 days
User Story: As a player I want clear feedback of when the combat ends and the result In order to understand the final outcome		
Acceptance Criteria: ● The victory or defeat result is clearly shown. ● Smooth transition.		

User story 27:

Title: Intuitive Controls	Priority: High	Estimate: 1 day
User Story: As a player I want simple and intuitive controls In order to move, explore and interact with the game easier		
Acceptance Criteria: ● The player can select and play cards easily during combat encounters. ● Inputs respond immediately without a noticeable delay. ● Basic introductions are available for new players. ● Controls are consistent.		

User story 28:

Title: Minimal UI Clutter	Priority: Medium	Estimate: 1 day
User Story: As a UI designer I want the interface of the game to remain clean and simple In order to avoid overwhelming the player with too many options and elements		
Acceptance Criteria: ● Only essential elements are shown. ● The game's screens are not overcrowded by elements. ● The interface feels smooth and consistent.		

User story 29:

Title:Dynamic Background Music Design	Priority: Medium	Estimate: 2 days
User Story: As a sound designer I want background music that matches the different stages and environments of the game In order to enhance the immersion and emotional tone of the game		
Acceptance Criteria: ● Main screens and exploration areas have a calm or ambient music. ● Combat has more intense and fast pacing music. ● Music changes appropriately and smoothly when entering combat. ● Transitions are smooth. ● The music tracks are in a constant loop.		

User story 30:

Title: Run Time Awareness	Priority: Low	Estimate: 1 day
User Story: As a player I want to know how long my runs lasted In order to manage my time and performance		
Acceptance Criteria: ● Time starts running once the run has started. ● Time is displaced during and after the run. ● Time is shown as part of the stats of the player.		

User story 31:

Title: Run Comparison	Priority: Medium	Estimate: 1-2 days
User Story: As a data analyst I want to compare different runs In order to identify patterns and the player performance		
Acceptance Criteria: ● Runs can be compared by stats. ● Differences are noticeable. ● The stats data is well summarized.		

User story 32:

Title: Health Bar	Priority: High	Estimate: 1 day
User Story: As a game designer I want the player health to have a fixed maximum amount In order to maintain balance in healing and combat mechanics		
Acceptance Criteria: ● Player health cannot exceed 100. ● The enemy health varies depending on the difficulty and is predefined by a numerical range. ● Healing stops at maximum value. ● If the health reaches 0 from either the player or enemy the combat ends.		

User story 33:

Title: Boss Room Discovery	Priority: High	Estimate: 2 days
User Story: As a player I want to explore the interior area to discover which room contains the enemy In order to plan my exploration and discovery of new rooms		
Acceptance Criteria: ● The boss room is hidden. ● It is revealed when entering. ● It generates randomly every run and level.		

User story 34:

Title: Main Menu Screen	Priority: High	Estimate: 1 day
User Story: As a UI designer I want the main menu screen to be visually clean, well organized and consistent with the games tone In order to allow players to navigate the game easily		
Acceptance Criteria: ● The main options are prominently displayed such as Start, Options and Credits. ● Buttons are distinguished and readable. ● Navigation is intuitive. ● The screen's layout is clean and not overwhelming.		

User story 35:

Title: Credits Screen	Priority: Medium	Estimate: 1 day
User Story: As a UI designer I want the credits screen to be clean, well organized and to contain the information of everything and everyone who had a role during the game development In order to present information clearly and professionally		
Acceptance Criteria: ● Names and roles are organized in a readable format. ● The text alignment and speaking is consistent. ● The design is consistent with the game's art. ● It's not overloaded with information. ● A clear option to return to the menu is displayed.		

User story 36:

Title: Combat UI Design	Priority: High	Estimate: 2-3 days
User Story: As a UI designer I want the combat interface to be well structured and consistent In order to help the player to quickly understand the available options and actions		
Acceptance Criteria: ● Player Health and energy is visible. ● Enemy health is visible. ● Cards at hand are displayed in an organized layout. ● Important elements are prioritized. ● The interface is not cluttered with elements.		

User story 37:

Title: First Time User	Priority: High	Estimate: 1 day
User Story: As a player I want the game to guide me the first time I play In order to comprehend the main mechanics of the game		
Acceptance Criteria: ● The first run includes guidance and hints. ● Introductions include the controls for movement. ● Introductions explain the usage of cards and their effects. ● Explain the health and energy bars. ● Explain how combats are played.		

User story 38:

Title: Pixel Art Visual Identity	Priority: High	Estimate: 2-3 days
User Story: As a UI designer I want all visual elements of the game to follow consistent pixel art style In order to create a cohesive and appealing in game experience		
Acceptance Criteria: ● All assets like characters, cards, map and environment are pixel art. ● The resolution is consistent across all elements. ● Animations respect the pixel art style of the game. ● UI elements like buttons and text align with the pixel art aesthetic. ● Not a single visual element breaks the style and art consistency.		

User story 39:

Title: Core Gameplay Loop	Priority: High	Estimate: 2 days
User Story: As a game designer I want the core gameplay loop to be clear and engaging In order to to ensure the player understands and enjoys the main flow of the game		
Acceptance Criteria: ● The loop of the game follows a clear structure. ● Encourages new runs. ● Each stage of the loop has a defined purpose or role.		

User story 40:

Title: Data Structure for Game	Priority: High	Estimate: 2-3 days
User Story: As a data analyst I want the game data to be organized in a structured way In order to easily analyze the game stats and performance		
Acceptance Criteria: ● Data from each run is stored in a consistent format. ● Key metrics are clearly defined and assigned. ● No data is lost or incomplete. ● The structure avoids redundancy. ● Relations between elements are consistent. ● The system allows for the retrieval of information for gameplay and analysis.
